Dear St. Patrick School Families,

Preparing students for life-long learning is a priority at St. Patrick School. This begins in Pre-School and continues right up to grade 8. Our dedicated staff ensures each student is exposed to challenging academic context in which they can encounter Christ on a daily basis, grow in human and theological virtues, and build a culture of academic optimism and success! Each child becomes part of a school family that has over 100 years of tradition.

There are wonderful programs that go on in our school: an accelerated reading program, individual math skill program, hands on curriculum learning, technology and STEAM programs and a variety of extra curricula activities including **interscholastic sports teams for 6th, 7th and 8th grades beginning in the 2017-2018 school year.**

Enclosed with this letter is tuition payment information for 2017-2018 school year. We strive to keep tuition costs as low as possible while still maintaining the stability of our school and programs and seeking ways to make improvements to benefit everyone. Our tuition costs are still well below the actual cost of educating the students. We will continue to contract with FACTS Management Company to help us manage our tuition payment program. All families are asked to sign up for a FACTS Account whether utilizing a monthly automatic payment plan or a payment in full plan. **Attached to this letter is important information regarding tuition assistance. All families (parishioners and non-parishioners) must complete this process to qualify for any financial assistance.**

It is now time to register for the 2017-2018 school year. Naturally, we hope to re-register each and every student from this year, and responsibly increase enrollment for the 2017-2018 school year. Registration is an important part of the planning process for our school, both with respect to our budget but also for academic reasons as well. **Please be sure to complete your registration form and return no later than March 1, 2017.**

If you have a younger child not currently registered in our school, you will be able to register them with your older children. You will need to complete an application which is available on our school website or through our office. Please complete the application for any siblings not currently attending St. Patrick School. If you have any questions about re-registration please contact the school office at 269-5547.

St. Patrick School is an investment in your child's life not only for academic and spiritual growth but for friendships and success. We are grateful to serve your family and committed to your children.

Sincerely,

Maureen K Gildein, Principal
